

ACROMEGALY ASSEMBLY

A CASE-BASED APPROACH TO DIAGNOSIS AND TREATMENT

What questions should I ask my doctor about acromegaly?

Your doctor can answer many of the questions you may have about acromegaly and its treatment. These are some of the questions you may want to ask:

- What tests do I need?
- Are there specific specialists I need to see?
- What are the advantages and disadvantages of the different treatment options?
- What are the adverse effects of the different treatments
- How long will I need treatment before my symptoms improve?
- Once my symptoms improve with treatment, will it come back if I stop treatment?
- I have other health conditions. Can I still receive treatment for my acromegaly?
- How will you monitor my condition and treatment?
- Should I alter my diet?
